

# Optimize efficiencies at scale with built-in data redaction

Stay focused on closing deals faster from within Venue with automated bulk redaction. Optimize efficiencies by 50% or more by automating the multi-file redaction of sensitive information in uploaded documents without overwriting original files.

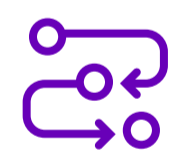

## STREAMLINE REDACTION WITHIN PLATFORM

Venue includes everything you need to analyze documents, find sensitive and personal data, and create permanently redacted PDF files in a single platform.

## INCREASE PRODUCTIVITY AND REDACTION SPEEDS

You can work in native files including Excel, Word, HTML, TXT and CSV documents, as well as files in Adobe PDF format.

## ENHANCE WORKFLOWS USING MULTIPLE FILES

With Venue, you can begin the redaction of a document, save a draft with temporary redactions, and then resume redactions later.

## CURATED PATTERNS AND USER-DEFINED TERMS

Users can easily define custom redaction terms by selecting data from a document and then have Venue automatically find all other instances.

## REDACT ANYTHING INCLUDING IMAGES

Venue lets you click and drag to create redaction regions that automatically protect everything inside, including sensitive or private data in images.

### Patterns

- Select All
