

PRODUCTS & SOLUTIONS | VENUE

Get Security at Every Level With Venue®

“Having confidential information fall into the wrong hands can be a deal-killer. It gives me peace of mind to know that Venue has all the protections in place to ensure my documents are safe and secure.”

VICE PRESIDENT, FORTUNE 500 TECHNOLOGY COMPANY

WORLD-CLASS FRAMEWORK

Our enterprise-grade network of service centers and distributed server platform deliver consistent uptime, with extensive backup procedures, redundancy and disaster recovery plans. All Venue systems are penetration-tested with third-party evaluations verifying strict adherence to AT 101 SOC 2 standards.

ROBUST DATA SAFEGUARDS

Multi-factor authentication and 256-bit encryption ensure that your communications are protected. Custom alerts and on-demand reports keep you apprised of all activity in your room. Venue also has all the necessary controls in place to support compliance with HIPAA and CFR Title 21 Part 11 regulations.

COMPLETE FILE CONTROL

Venue's sophisticated Information Rights Management technology makes it easy for administrators to limit a user's or group's ability to access, save or print content. Control file access all the way to users' desktops. Secure PDFs, Symantec virus scanning and dynamic watermarking, paired with SSL/TLS and IPSec protocols, provide unmatched control over every document in your room.

DEDICATED SUPPORT AND OVERSIGHT

Your Venue Client Services team is ready 24/7/365. All employees are rigorously background-checked prior to onboarding. At the enterprise level, our Chief Information Security Officer and full IT Governance team oversee adherence to confidentiality.
