Venue Data Privacy Assessment

—

Venue's data privacy assessment tool transforms the way that organizations adapt to rapidly changing compliance standards around the world. Donnelley Financial Solutions (DFIN) is the first to harness the power of intelligent technology to analyze the liability of your data room and reduce exposure. Mitigate risk 91% faster with Venue's data privacy assessment and auto-redaction capabilities — saving time and effort.

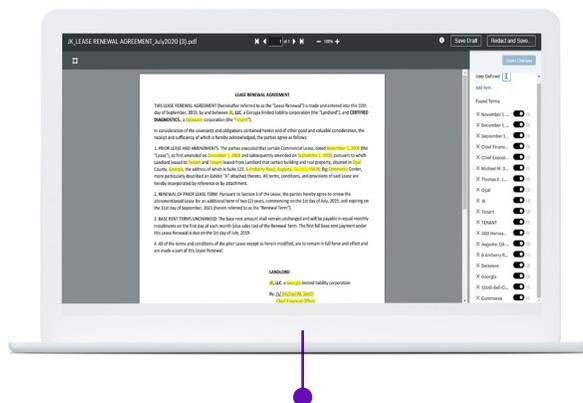

Identify and mitigate PII across your projects

Automate risk assessments efficiently

- Analyze the liability of documents with intelligent technology.
- Immediately visualize the risk as a color gradient heat map.
- Save hours tied to manual search and assessment of risk.

Auto-redact instantly to move your projects forward

- Mitigate all sensitive information within your data room: scan, identify, redact.
- Protect PII using a secure, systematically burned-in redaction.
- Report on all redaction activities for extra transparency.

Redact all of the pre-selected, user-defined PII categories at once within documents.

Do you want to mitigate risk at speed? See how DFIN can bring efficiency to redaction with our intelligent technology.
