CHALLENGE

Executing complex financial transactions

McCarthy Stone is a dynamic company with sophisticated needs for sharing sensitive data with many stakeholders. The company initially needed a virtual data room with expert deal support to manage the complexity of taking the company public on the London Stock Exchange.

Later, in groundbreaking transactions for their industry, they needed data rooms to sell properties to investors and take the company private through private equity investment.

SOLUTION

Venue makes complex transactions straight forward with expert deal support

Successfully completing deals involves more than operating a virtual data room. It requires the participation of deal experts with a willingness to work with clients and provide the best possible service and support. After years of leveraging Venue to complete financial transactions, McCarthy Stone is now piloting DFIN's Data Protect Solutions to respond to Data Subject Access Request (DSARs) by automatically locating and redacting personal information (PI) to increase efficiency and control costs.

The DFIN team is very approachable and delivers high-quality service and support. Their willingness to work with us to achieve the best outcomes is highly valuable. Of course, it helps that Venue makes everything so easy to do. New data rooms are ready the same day they are needed and offer lots of structure and user onboarding options. Convenient drag-and-drop uploads of directories, folders, and files make it possible for anyone to manage data room contents."
