

DFIN CASE STUDY

How Venue's High Security and Collaborative Design Delivered for Biopharma

Venue®
by DFIN

 PALISADEBIO

CHALLENGE

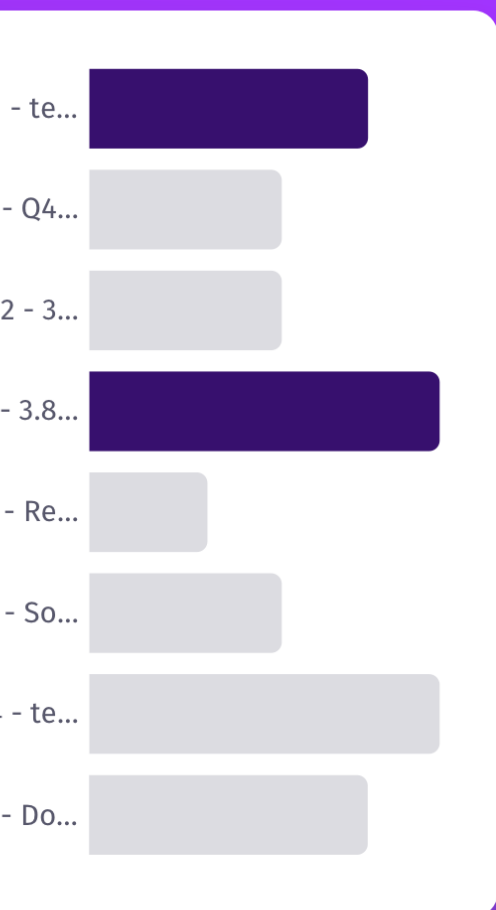

Keeping a clinical team on-task in a crisis

When COVID-19 began shutting down most U.S. workplaces, California-based Palisade Bio was in the midst of a vital Phase 2 clinical trial to test the efficacy of its main drug. A shutdown would have meant a delay or even an end to their study.

To keep the study alive, Palisade Bio put DFIN's Venue to a novel use — sharing and managing clinical trial data — that revolutionized the way they do business.

Creating Room

SOLUTION

The virtual data room built for biopharma

Venue's encrypted virtual data room met all of the stringent security requirements regarding patients' protected health information. Because the software was so intuitive and easy to use, workers at the study's 11 trial sites and independent study monitors quickly got up to speed. Palisade Bio plans to use Venue for future studies thanks to its integrated redaction capability as well as cost and time savings.

INSTANT SET UP

Venue's highly intuitive user interface took minutes for study personnel to submit medical record data remotely.

TRUSTED SECURITY

Meeting HIPAA and other privacy concerns was no problem thanks to Venue's 256-bit encryption.

EASY COLLABORATION

All teams were able to submit and access documents quickly and easily.

“

Working with DFIN's Venue left us questioning why we were doing things how we have always done them. Using the platform has certainly opened the eyes of our company and the industry in general. We found a new way to do business that offers efficiency and cost savings and is a long-term solution.”
