CHALLENGE

Finding a platform facilitating the management of numerous transactions at once

With clients around the globe, Goldenhill required a data room that streamlined the management of several transactions at once. It was also essential for them to have a VDR with a user friendly Q&A capability, keyword search at file level and the ability to redact sensitive information in addition to watermarking documents.

SOLUTION

Venue makes the due diligence process straight forward with expert support

For Goldenhill choosing Venue data room was a no-brainer as it facilitates and accelerates their due-diligence processes thanks to the easy to use Q&A capability allowing them to bulk import/export Q&A, assign group leaders, direct questions to experts and get notified on new outstanding questions. The scheduled reports and alerts also provides valuable insights into buyers activity and helps keep the due-diligence process moving smoothly.
