DFIN Web Hosting: Meet SEC Compliance Regulations While Creating a Superior Investor Experience

With DFIN Web Hosting, you can fulfill your obligations to comply with evolving SEC rules while providing an investor experience that reinforces your brand.

As a component of ArcDigital®, DFIN Web Hosting has been developed by experts who know the industry and its regulations. We currently host over 100,000 documents and execute more filings than any other financial technology or services company, so we are always current with evolving SEC regulations. As new rulings like Tailored Shareholder Reports come out, adding complexity along with document volume, and investor expectations evolve, a mobile-optimized interface will be key to allowing for anytime, anywhere engagement. You work hard to create and promote your brand — DFIN Web Hosting ensures a consistent and optimal user experience by investors and prospects alike.

Everything you need to stay compliant, in one centralized repository

The regulatory environment is rapidly changing. With DFIN, you can be confident you are fulfilling '40 Act obligations as well as meeting the latest rules and requirements supporting layered disclosure.

EFFICIENT

DFIN Web Hosting tracks SEC filings, and then dynamically loads and updates the most accurate versions of the print-ready PDF documents in a proprietary, secure repository, often within an hour or two of the filing. Built on principles of the SEC's layered disclosure initiatives, the web-hosting solution is built to easily adjust and accommodate newer SEC rulings like the Tailored Shareholder Reports final ruling.

COMPREHENSIVE

Your customers can access all the information they need on one website, including:

- Statutory and Summary Prospectuses, Supplements, and SAIs
- Shareholder Reports
- Fund Fact Sheets
- Q1 & Q3 Holdings
- N-CSR and N-CSRS
- Proxy Voting Record
- ISPs, USPs and Financial Statements to Support SEC Variable Products 498A Rule
- Third-party Funds for Variable Annuity and Life Products

FLEXIBLE

DFIN can host additional documents that you wish to make available to your investors, such as market commentaries. We also offer optional website accessibility as well as ADA tagging of hosted documents to support a more inclusive investing experience.

Why outsource to DFIN Web Hosting?

Web hosting is a full-time job, requiring continual monitoring of the SEC for new filings and supplements. Some companies manage their document hosting internally in an effort to keep costs down, but find that there are often underlying monetary and resource costs to consider.

DFIN Web Hosting gives you a trusted and reliable compliance solution, with a built-in disaster recovery system and a manageable and predictable cost structure. It can also improve internal efficiencies, reduce errors and mitigate risk. Your teams can spend less time updating and uploading document versions and more time on strategic initiatives and asset management.

IN-HOUSE WEB-HOSTING COSTS

Ongoing Infrastructure

Maintenance, Audits and Continuity Plan Validation

Software

Upfront Licensing Fees

Maintenance and Update Fees

Internal Resources

Document Management

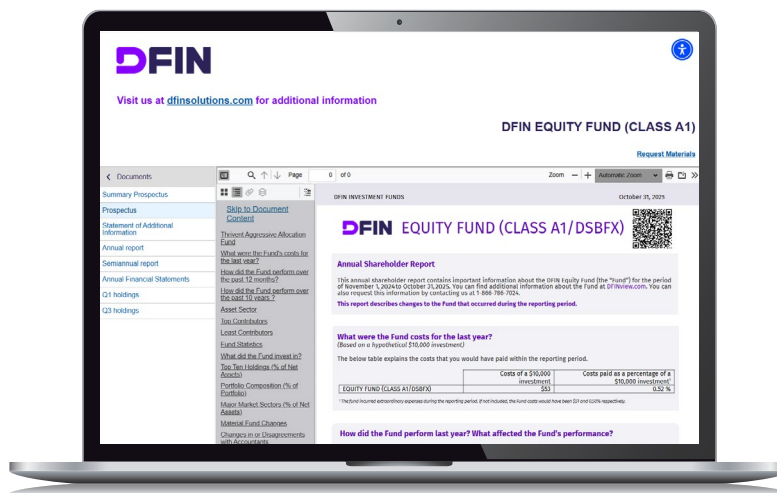

Ongoing Maintenance

Updating Document Postings Such As Supplements

Provide a better customer experience

DFIN-hosted websites can be customized to meet client-specific branding and design needs, creating a seamless customer experience. DFIN hosts professional-looking, graphic-rich PDFs instead of difficult-to-read HTML renditions converted from EDGAR, reinforcing your branding and reducing the risk of errors. Per SEC regulations, all documents will be suitable for printing.

The intuitive browser agnostic interface provides a consistent user experience and allows users to navigate with one click from a document to other related regulatory documents. In addition, in keeping with the new SEC requirement of offering request-to-print functionality, there will continue to be a “Request Materials” button integrated with DFIN’s internal print system to fulfill the order.

Choose the hosting option that best meets your needs and budget

DFIN Web Hosting offers flexible and customizable options. We can integrate with an existing website or create and manage your information, adapting to your technology needs and keeping within brand guidelines. Either option offers personalized, responsive customer service for support and postings, as well as simple, predictable pricing to stay within budget parameters.

Ensure accessibility for all your customers through ADA/AODA compliance

To meet your DEI goals and mitigate risk around customer accessibility challenges and legal issues, DFIN can support you with optional add-on services. From enabling website screen readers to helping solve for dexterity issues by providing navigation alternatives, we are committed to staying at the forefront of accessibility solutions. With these services, you’re able to deliver information to an evolving customer base in the format that works best for them.

Arc Suite®

Financial regulatory compliance through a single platform

DFIN's Arc Suite platform and its products — ArcReporting®, ArcPro®, ArcRegulatory® and ArcDigital® — offer regulatory, reporting, legal, filing and distribution solutions through one integrated financial compliance management software platform.
